PROJECTS

Digi Fix (07/2022 - 09/2022)

- Digi Fix was an eCommerce web application. The Platform was a personal project aimed at creating a user-friendly and feature-rich online shopping experience. The platform targeted tech-savvy consumers seeking a wide range of products with convenient payment options. The project showcased my ability to design, develop, and integrate complex functionalities into a cohesive web application.

Risk Pro (02/2023 - 05/2023)

- Riskpro was incorporated in India as a limited Liability entity in 2009. Today, Riskpro India Ventures Private Limited ("Riskpro India") is a specialized Risk Management solutions and Risk consulting company. It is managed by experienced professionals with experiences spanning various industries.

Golf Champs (09/2022 - 11/2022)

- The Social Golf Fantasy Game. Add our four golfers' actual scores together for the weekend and track progress up the leaderboard. Made some changes to stabilize the functionality.

CERTIFICATES

GIM (Graduation In Multimedia) (06/2019 - 02/2022)

Acquired a solid foundation in programming languages commonly used in multimedia development, such as HTML, CSS, and JavaScript. Developed a keen eye for design principles and aesthetics, understanding how to create visually appealing and user-friendly interfaces.
